

Steel Entry Doors: Wood Edge

Our Steel Entry Doors with Wood Edge are a great balance of beauty and strength. The door is built with 24 gauge galvanized, roller-coated steel, and employs 1 3/16" painted wood edges. The "J" bend allows for a positive interlock. Add some extra style to your entrance with matching sidelites in either 12" or 14" widths – sidelites are available in a wide range of styles, including features like external grilles, decorative glass inserts, and more!
